FBIS Analysis Group Media Files

FBIS Analysis Group maintains extensive files, unique in the Community, of authoritative statements monitored from the media of foreign countries. They include texts of leader speeches, official statements, and authoritative media commentary as well as extracts of Soviet and Chinese statements on some 600 key themes relating to foreign and domestic policies and military doctrine. The files are used to support FBIS media analysis and to respond to requests from offices throughout the Government. In a recent service to the Senate Foreign Relations Committee, for example, FBIS collated within a half hour the texts of all joint communiques issued by the People's Republic of China with West European countries as an aid to identifying West European positions on the status of Taiwan. FBIS' modernization planning looks toward automating the storage, search, and retrieval of this information, utilizing the machine-readable DAILY REPORT to be produced by the MIDAS (DAILY REPORT automation) system.
